

Notes – Analysis

Key Issues:

- Incorrect information captured by Athelas (e.g. “3 clicks daily” vs “150 mg daily” as per consult note).
- Lab details inconsistency in units (e.g. Free testosterone measured as “236 pg/mL” vs “23.6 ng/dL”).

Athelas Notes Review

Signed Notes Comparison:

Note	Issue Identified
In-person consult for follow-up and lab review. Patient confirmed taking testosterone cream, 3 clicks daily.	Inconsistent dosage description compared to previous visit.
In-person consult for follow-up and lab review. Patient taking testosterone compounded cream 150 mg daily. Labs reviewed and documented.	Dosage differs from later entry; unit inconsistency for Free Testosterone (pg/mL vs ng/dL).

Before vs After Correction

Before (Athelas)	After (Corrected)
Testosterone: 1019 ng/dL – Free testosterone: 236 pg/mL (23.6 on other lab scale) – Vitamin D: Good – PSA: Stable – Iron studies: Fine – Blood counts: Good – Hemoglobin A1C: 5.5 (up from 5.1) – B12: Good – Creatinine: Slightly above normal range – Cholesterol: LDL borderline high	• Total Testosterone: 1019 ng/dL • Free Testosterone: 23.6 ng/dL • Hemoglobin A1C: 5.5% (up from 5.1%) • Creatinine: Slightly elevated • Cholesterol: LDL borderline high • Vitamin D: Within normal range • PSA: Stable • Iron Studies: Normal • B12: Normal

Fixes Implemented

- Standardized lab units across all metrics (e.g. Free Testosterone now shown as **23.6 ng/dL**).
- Clarified medication dosage (“150 mg daily” verified via transcript; replaced inconsistent “3 clicks daily”).
- Reformatted **Patient Metrics** for clarity using bullet points.

Template Suggestion

Current Template:

```
"Patient Metrics": {  
  "type": "string",  
  "title": "Patient Metrics",  
  "description": "Include the number of days/hours after the application of cream or injection  
when last labs were drawn inline with the title separated by a colon (:)."  
}
```

Suggested Change:

```
"title": "Patient Metrics",  
"description": "Each metric should be a separate item in the list (displayed as bullets).",  
"items": {  
  "type": "string",  
  "example": "Total Testosterone: 550 ng/dL"  
}
```

Example Outcome

Athelas:

Patient Metrics:

- Total Testosterone: 1019 ng/dL
- Free Testosterone: 23.6 ng/dL
- Hemoglobin A1C: 5.5% (up from 5.1%)
- Creatinine: Slightly elevated
- Cholesterol: LDL borderline high
- Vitamin D: Normal
- PSA: Stable
